A New ELTR website

- We are in a process of modernizing the ELTR data management and analysis procedures. Features of the new procedure are summarized in the opposite slide.
- The web-based platform will offer to the centres:
  - Better quality control
  - Speed of execution
  - More secure storage of data
  - Faster delivery of results for ELTR studies, presentations, publications...
- A 3 years contract has been signed with Manettis® Company that will use SAS technology for this project.
- The new ELTRweb platform will be operational end of 2013.
- A workshop will be organized in Paris after the centres will have tested it during some weeks.
